

## Harvard Bite

### Bite registration material based on A-silicone

long shelf life!

- Outstanding grindability
- High hardness
  - Precise and distortion-free
  - Easy to cut and mill, still extreme resistant
- Very fast setting
  - Only 45 seconds setting-time in mouth
  - Precise bite registration
- Very low shrinkage
- Very good biocompatibility
- Optimal thixotropic flow
  - No flow from the tooth for a perfect registration
- Easy to use in cartridge
- Pleasant vanilla flavour
- Durable storage of bite registrate

Fast setting, precise, grindable.

Optimal thixotropic flow for perfect bite registration

Harvard Dispenser Automix 1:1

2 x 50 ml

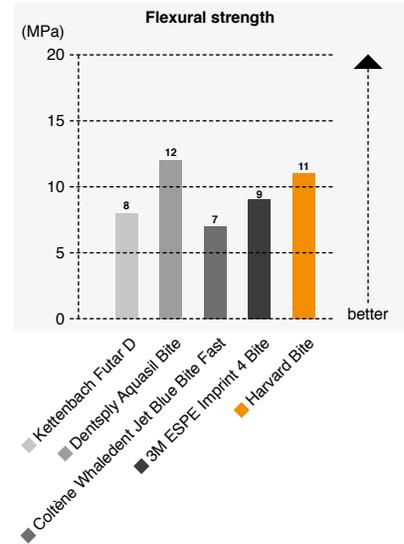

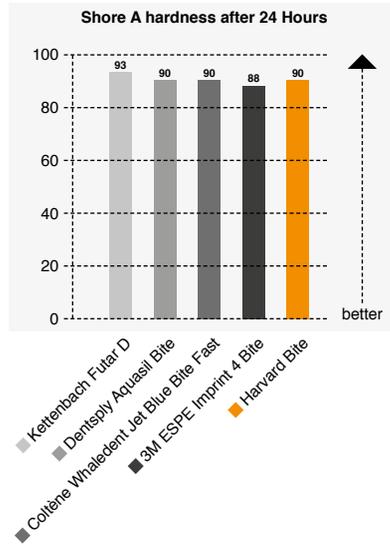

12 x mixing tips

# Experience the difference.

## Physical Properties

“ Harvard Bite has convinced me with its positive properties. ”

1. The material displays a high level of recovery from deformation.
2. It sets very fast, becomes very hard, yet remains flexible.
3. It is well suitable with CMD patients.
4. The material is very easy to cut.

The advantages of Harvard Bite especially in CMD patients are very good flow properties combined with a very high hardness after setting. This allows an ideal fixation of the registration. I would recommend Harvard Bite to all dentists and colleagues at any time.

With best regards  
Kay Zischow, Zischow Dental Hamburg GmbH, November 2012

1. Intraoral application of Harvard Bite: optimal consistency
2. Only 45 seconds setting
3. Outstanding reproduction of the bite situation
4. Bite registration
5. Precise cuttability and grindability
