Impression material of a new Generation...

...that is Harvard SuperSnap®. This product combines all the advantages of our previous Premium-Sil products with new setting properties.

You are looking for a combination of a long working time and a short oral setting-time

- This allows a stress-free workflow, time savings and increases patient comfort.

You want to use two different types of setting times depending on the clinical situation.

- Available in 2 snap-set variants: **Regular Snap** and **Quick Snap**

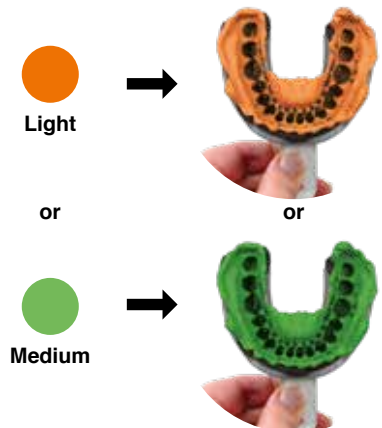

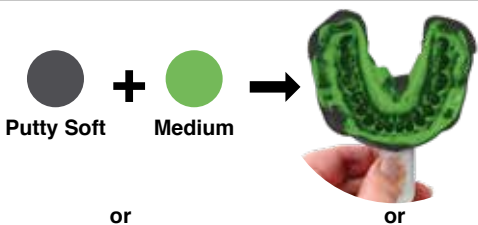

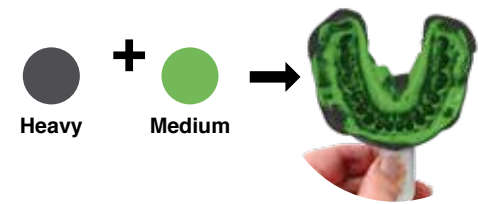

You want an exact readability.

- Harvard SuperSnap® offers new high-contrast colors for exact readability.

Harvard SuperSnap® offers as usual:

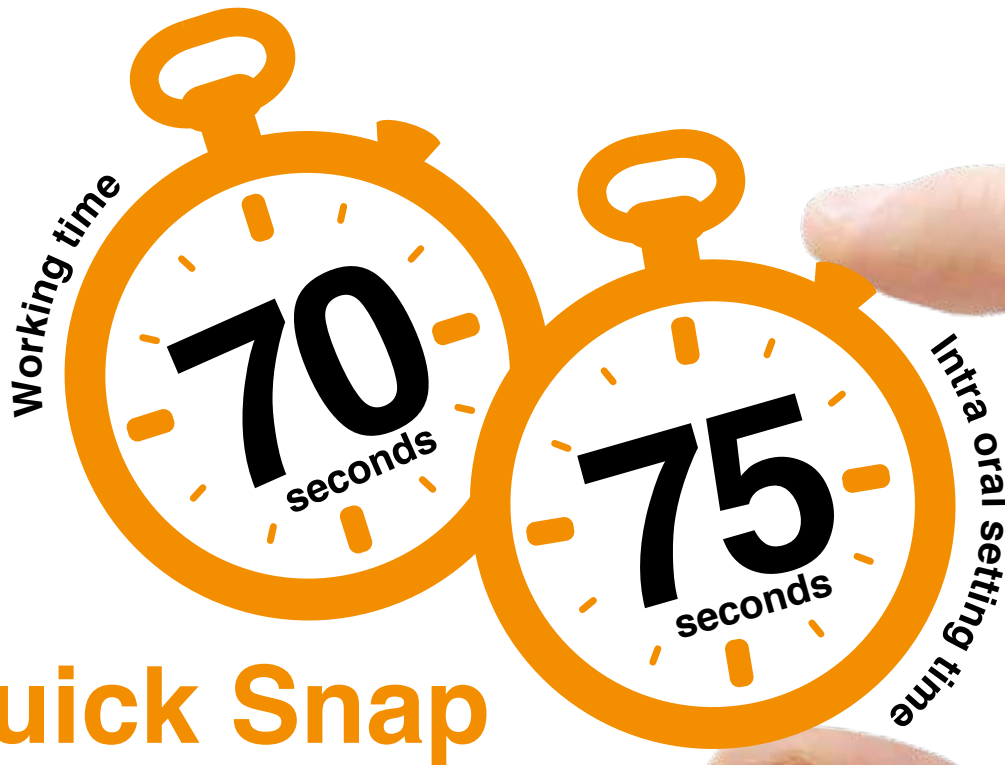

- Excellent flow properties
- High elastic recovery and dimension stability
- Excellent legibility
- Super hydrophilicity for perfect results and excellent reproduction of details
- As usual: very berry!
- Suitable for the sandwich technique and the putty-wash technique
- Different viscosities: Putty, Putty Soft, Heavy, Mono, Medium, Light
- Optimal kneadable consistency for the putty products

The recommended combinations of Harvard SuperSnap®:

Technique	Phase 1	Phase 2
2 steps / 2 phases putty-wash technique (Material application successively)		
1 step / 2 phases sandwich technique (Material application simultaneously)	 <p>or</p> 	
1 step / 1 phase Monophasetechnique		

Numbers that speak for themselves!

Product	Working time 23°C / 73°F (min: sec.)		Oral setting time (min: sec.)
